DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, 9, drawn to a nucleic acid molecule, nucleic acid constructs and a method of making a protein by recombination technique.

Group II, claim(s) 6-8, 14, and 15, drawn to a peptide.

Group III, claim(s) 10, and 11, drawn to a method for detecting the expression of sorbin in a cell using a nucleic acid molecule.

Group IV, claim(s) 12, drawn to an antibody.

Group V, claim(s) 13, drawn to a method for detecting the expression of sorbin in a cell using an antibody.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The nucleic acid molecule, protein, and antibody in Groups I, II, and IV have different structures and functions as the nucleic acid molecule encodes a peptide, the protein maybe used in an assay and the antibody plays a role in immunity and responds to an antigen. The nucleic acid molecule and the antibody of Groups I and IV has uses other than the methods in Groups III and V since the nucleic acid molecule maybe used to encode a peptide and the antibody maybe used to fight or prevent infection in response to an antigen and thus Groups I, III, IV and V are distinct inventions. The method of making a protein by recombination in Group I and the additional methods in Groups III and V are impermissible as PCT Rules 13.1-13.2 do no allow for multiple methods. Further, an isolated nucleic acid molecule comprising a nucleotide sequence in SEQ ID NO:8 is known in the art (WO 99/22243; see attached copy of sequence alignment). Therefore these claims lack a common, novel inventive step and lack unity of invention under PCT Rules 13.1-13.2.

3. A telephone call was made to Douglas Jackson on August 29, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
